

PARKWOOD
WELCOME HOME

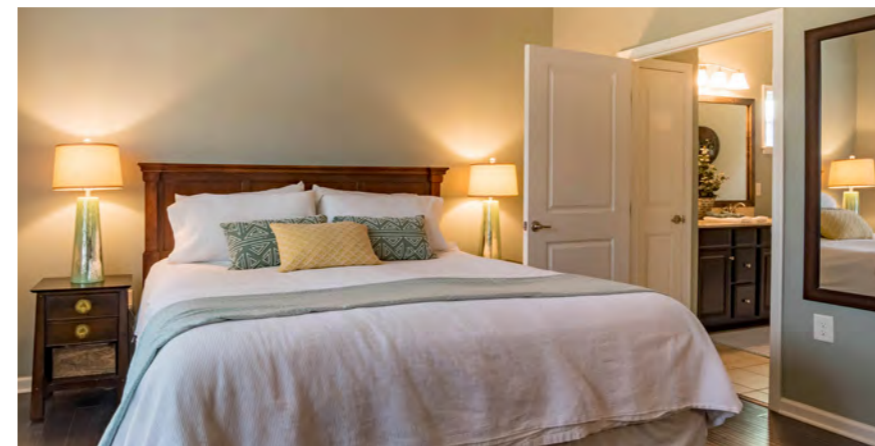

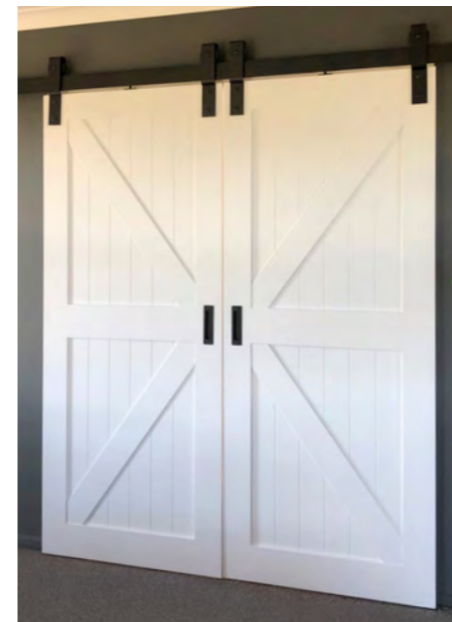

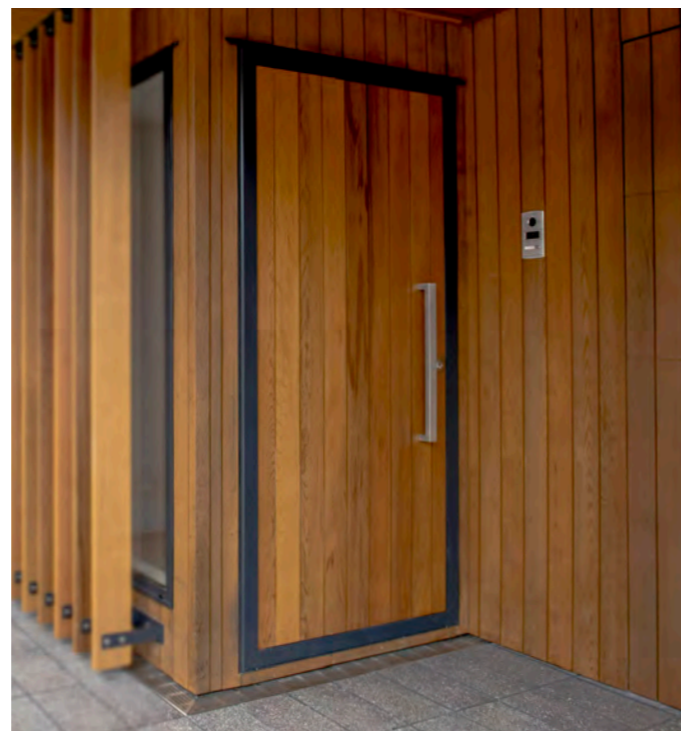

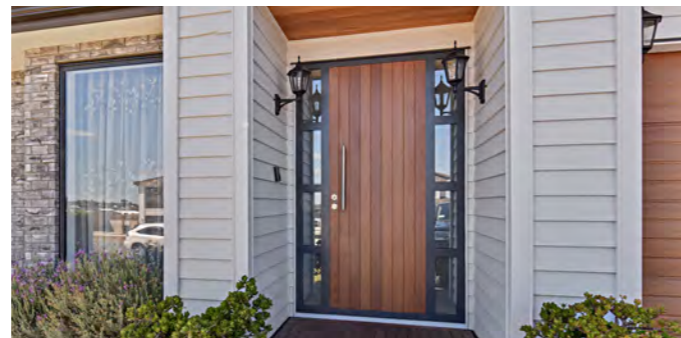

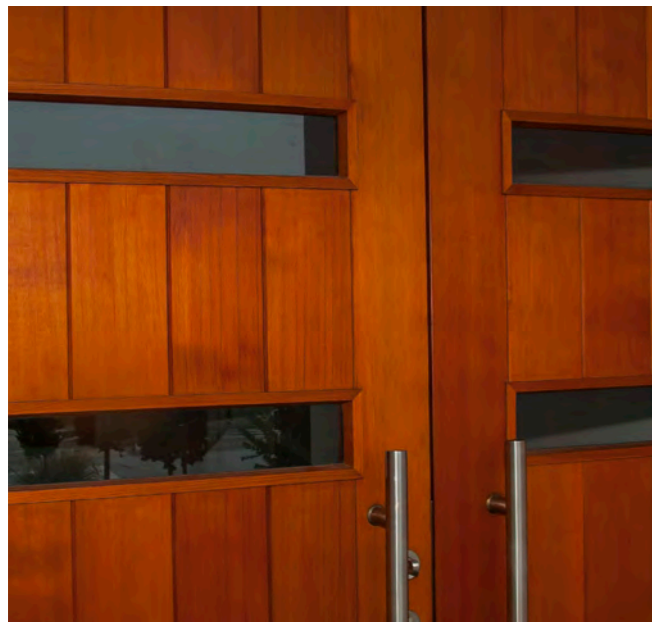

TIMBER INSPIRATION

CATALOGUE

WELCOME TO OUR TIMBER COLLECTION, DESIGNED TO INSPIRE ANY HOME.

Parkwood designs and creates doors that last. Whether they're handcrafted from high-quality timber for interior or weather-protected entranceways, or aluminium and composite doors built to withstand the most extreme weather conditions. Whatever choice you make, they'll be a beautiful addition to the most important asset in anyone's life – their home – that will add value immediately, and in the years to come.

HAMPTONS/COASTAL

THE PERFECT CHOICE OF TIMBERS

STRENGTH, STYLE AND SUSTAINABILITY

Parkwood's solid timber doors are made from a range of timbers that are reliable for joinery and sustainably sourced. Suited to weather conditions in Australia and New Zealand, options are priced within everyone's budget —offering colours and grains to suit almost any door design.

WESTERN RED CEDAR

Drawn from beautiful Canadian forests, this product is in hot demand worldwide for its rich, red colour, superior stability and variety of grains and shades. Although still a favourite of timber joinery, it is now a premium timber and this is reflected in the price.

RADIATA PINE

Parkwood uses pine that is precision sawn and kiln dried, and then dressed on all four sides. The result is a dimensionally stable, clear wood product. The trees from which Clears are made are carefully selected, managed and processed to achieve a product that is reliable and strong, with high visual and aesthetic appeal. (For oversize doors, Vulcan is recommended for stability).

WESTERN HEMLOCK

Prolific in western Canada and the U.S., it is a popular, premium timber for joinery, panelling and doors. Builders favour this species because it is resistant to splitting, holds nails and screws securely and saws easily without splintering. Exhibiting a natural lustre and a relatively fine texture, the heartwood is straw to pale brown, sometimes with a pinkish tinge. It generally has a straight, even grain, displaying interesting grain patterns on flatsawn surfaces due to conspicuous growth rings.

VULCAN

Stability. Resistance. Durability. A timber that will never move. With chocolate-brown depths and even grain, all finished nicely with engineered lamination lines, this exciting new brand is a breakthrough for the timber world. It is thermally modified in specialist computer-monitored kilns, so the individual pores of the timber no longer absorb moisture, meaning it will not change like other natural products. This patent-protected product has a laminated structure for even greater strength and is FSC certified.

ROSEWOOD

A hardwood that is reliable for joinery, it ranges in darker colours from yellow-brown to gold and red-brown. It has remarkable physical beauty and an amazing range of uses and durability, matched only by timbers which are more expensive or do not possess the same physical attraction or working qualities.

AMERICAN WHITE ASH

This light-coloured hardwood that is close to American White Oak, has creamy white to light-brown heartwood with white-coloured sapwood, with uniform texture. Beautiful grain and versatility bring the much-sought-after natural charm of timber to many high-end residential and commercial projects.

MORE TO EXPLORE

When you're looking for that something extra, we also have an extensive product range for consideration, including;

Duramax - our beautiful, composite interior and exterior doors

Thermtek - Architecturally designed, powder coated aluminium front doors capable of enduring any weather conditions.

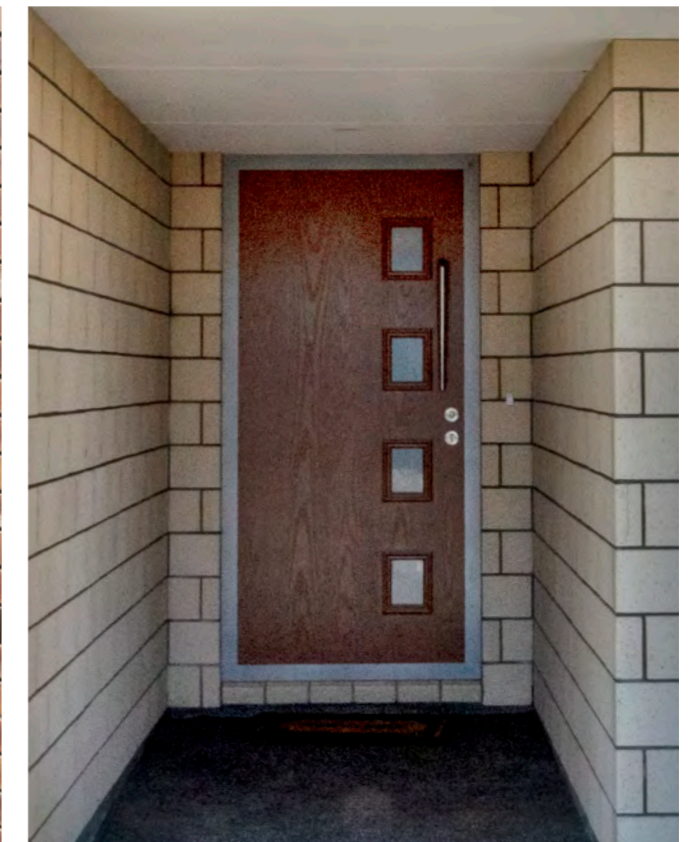

DURAMAX INTRA

Duramax interior doors are perfect for wet or high-traffic areas.

ALUMINIUM ENTRANCE DOORS

Our Thermtek aluminium entrance doors are perfect for withstanding harsh conditions, or for a powder-coated pop of colour!

DURAMAX DOORS

Duramax doors are composite engineered to withstand extreme weather conditions, backed up by a 10-year warranty.
